

## New Pr1 Appliance firmware release + SD card for free

Friday, 19 November 2010 17:12

---

New firmware ( [ulmage-pr1-v401.img](#) ) for PR1 Appliance has been released.

In this release the SD card support is improved.

As an extra benefit for our customers all PR1-Appliance units from now on will be equipped with 2GB (or bigger) SD card plugged in.

It is always a good idea to BACKUP your configuration files and custom voice prompts (if any) before upgrading!

Firmware you can find at the download section of the site
